

"As a grout restoration specialist, I was frustrated with the quality of grout sealants that lasted for only a few years and then had to be redone. Worse, I noticed a trend that darker grout colours were being chosen solely to match the colour of dirt!

"This new process is nothing short of amazing. We've been using it since late 2013 and the **results have been fantastic.**

"ColorClad's many colour choices and long-term warranty are **revolutionizing tile design and maintenance**—and our customers couldn't be happier."

—**Matt Racz**, owner, Restore & Care Plus

## Say goodbye to unhealthy dirt and mildew. Say hello to **clean and beautiful.**

## The easy and cost-effective way to protect (or restore) your tiled finishings

Ceramic, porcelain or marble tile adds beauty and durability, but it's often a major investment. So it's no wonder that many homeowners are dismayed to see their beautiful tile looking dull and dingy in only a few months.

The problem isn't the tile, it's the porous grout material, which absorbs liquids and acts like a magnet for dirt, bacteria and mold. Within a short time, the once-beautiful tile is surrounded by stained, discoloured grout lines that are extremely difficult to clean and restore.

**Until now.**

## Introducing ColorClad:

### The next evolution in grout restoration and protection

The ColorClad system is a revolutionary **finishing process** for tile grout that provides long-term protection against mold, dirt and stains. It **works with all types of grout**: sanded, unsanded, polymer and polymer modified—even epoxy grouts—for both interior and exterior applications.

Available only through professional tile restoration specialists, ColorClad is breathable, flexible, colour-stable, non-yellowing and waterproof. Its unique properties actually **inhibit mildew growth**. It also contains active ingredients that enable maximum soil release and increase long-term durability.

**Installing new tile?** Because ColorClad comes in 89 standard colours, you're assured of getting the **exact colour** you want—regardless of the colour of the original grout. No more settling for a less-than-perfect match.

**Need to spruce up existing tile?** If your current grout is stained or discoloured, Restore and Care Plus will first clean and restore the grout lines before beautifying and protecting them with ColorClad, in any colour you choose. It's a great way to **get a whole new look** at a fraction of the cost of tile replacement.

- **Perfect for use in bathrooms**  
The protective coat is so complete, mildew and mold cannot embed in the grout, keeping the tile looking new for many, many years.
- **Perfect for use in kitchens**  
ColorClad is completely oil repellent; it will not break down when exposed to cooking oils and, because oil cannot soak into the grout, **cleaning is easy**.
- **Healthier for the home owner**  
ColorClad releases zero VOCs (volatile organic compounds). Because no harmful chemicals are released into the air, there is **no negative effect** on interior air quality.
- **Healthier for the environment**  
Once the grout has been protected with ColorClad, regular tile cleaning is simple and can be done using more ecologically friendly products, **saving time and money** (and the planet).
